T2 Helps You Turn Your Idea Into an Invention for Commercial Success

What is T2?

Technology transfer is the process by which existing knowledge, facilities, or capabilities developed under federal R&D funding are utilized to fulfill public and private needs.

300 Federal R&D Labs

Access information from federal labs and bring your idea, vision, and invention to the marketplace.

Are You An Innovator?

YOU ARE...

Grass roots inventors, agriculturalists, chemists, engineers, manufacturers, professors, administrators, scientists, energy technologists, and IT professionals ready to take your idea to the next level.

YOU HAVE...

Skills, drive and commitment along with varying degrees of education, research experience, and limited access to opportunities; yet you are passionate about seeing your vision brought to actualization.

YOU NEED...

Human capital, facilities, legal advice, financial support, a federal lab and more to bring your innovation to life.

Are You An Industrialist?

YOU ARE...

Small business owners, entrepreneurs, partnerships, collectives, LLCs, co-ops, investors, and thrill seekers looking for innovation to launch.

YOU HAVE...

Infrastructure, funding, and experience, but limited availability to inventors, R&D labs, and familiarity with T2; yet you are motivated to introduce a new product into the marketplace.

YOU NEED...

An idea, patent attorneys, a university lab, a federal lab, R&D consulting and more to see your innovation to commercial success.
